

WEE Pros
Water. Energy. Environment

Partner for Sustainable Solutions

Background

WEE Pros was founded by experts having more than 30 years of combined experience in water management and environment, their paths came across after joining the Integrated Water Resources Management (IWRM) master program for Arab & German Young Professionals in 2008. The founders are strongly linked to water and environment sectors in Germany and MENA region. We believe in knowledge exchange and technology transfer in multicultural context to solve the vicious problems hindering the principles of sustainable development.

Our Vision

To be an international innovative company, providing integrated, sustainable solutions and professional services for water, energy and environment (WEE). We bridge Germany and the MENA Region, we do understand both cultures.

Our Mission

Our team provides integrated services & consultation in water, energy and environment (WEE) sectors aiming at developing sustainable management systems. We work hand in hand with utilities, donor agencies, institutions, public authorities and organizations which are developing and/or operating WEE projects, and seek good practices and innovative concepts to overcome challenges facing WEE sectors

Why WEE Pros?

- WEE Pros team brings the benefit of a diverse knowledge working with public utilities, private sector, local communities, and international donor agencies
